

IM2500 SERIES AMPERE HOUR METERS

IM 2500 Series Ampere Hour Meters are instruments for Battery Monitoring and Electroplating Applications. Numerous options and features make it highly versatile and suitable for various applications. Use of timer control in such applications is highly inaccurate. AH meter replaces the timer giving precise control and many more facilities.

- Battery charge / discharge monitoring
- Rectifier on / off control
- Rectifier control while plating of metals like Gold / Silver / Nickel etc.
- Doser control for adding additives and brightner.

FEATURES

- Microcontroller based highly versatile and reliable digital circuitry.
- Dust proof membrane keyboard for programming.
- Ampere Hour / Ampere Min or Ampere Min / Ampere Seconds selection from keyboard.
- Four digit display for current count.
- One preset count with relay output at preset count.
- Shunt value programmable from keyboard.
- Floating decimal point, automatically selected depending on shunt value. One decimal resolution for shunt values below 25A.
- Battery back up to retain count in case of power fail.
- External Reset input to reset count.
- Size 96 x 96 x 150 mm.

MODELS

Ampere Hour Meter is available in following models

- IM 2501 Ampere Hour Meter without Totaliser
- IM 2502 Ampere Hour Meter with Totaliser
- IM 2503 Ampere Hour Meter with Totaliser and Doser Outputs.
- IM 2505 Ampere Hour Meter for Battery monitoring with charge / discharge counts.
- IM 2506 6 digit Ampere Hour Meter
- IM 2507 Ampere Hour Meter with independent Charge / Discharge Displays

Options

- Early warning relay output.
- RS232 output for computer interface.
- Printer output.
- Ampere Display.
